TULSIRAMJI GAIKWAD-PATIL
College of Engineering & Technology

Vision of Institute

**“To emerge as a learning
Center of Excellence in the
National Ethos in domains of
Science, Technology and
Management”**

Mission of the Institute

M1

To strive for rearing standard and stature of the students by practicing high standards of professional ethics, transparency and accountability.

M2

To provide facilities and services to meet the challenges of Industry and Society.

M3

To facilitate socially responsive research, innovation and entrepreneurship.

M4

To ascertain holistic development of the students and staff members by inculcating knowledge and profession as work practices.

Vision of Department

“To emerge as a learning Hub and center of excellence in the domain of Electronics and Communication Engineering.”

Mission of the Department

M1

To impart quality technical education through effective teaching learning process.

M2

To provide a platform for addressing societal issues and challenges encountered by industries.

M3

To foster a culture of research and instill innovative and entrepreneurial skills.

M4

To promote lifelong learning in order to foster the holistic development of students and staff through the knowledge and professional ethics.

Program Educational Objectives

PEO
1

Demonstrate essential technical skills to identify analyze, solve problems and design issues in Electronics and Communication Engineering.

PEO
2

Apply field knowledge, research and professional practices to meet the requirements of industries.

PEO
3

Imbibe lifelong learning practices and entrepreneurship skills in tune with Emerging Technologies.

PEO
4

Inculcate professional ethics and managerial skills to satisfy real life problems for serving the needs of society and environment.

Program Specific Outcomes

PSO
1

Formulate solutions to intricate engineering problems by applying fundamental principles from the Electronics and Communication Engineering technology.

PSO
2

Develop methodologies to analyze and design circuits in electronics for communication applications to meet the societal needs.

PSO
3

Implement project-based learning techniques to conduct experiments in Embedded Systems, communication system, signal and Image processing, Circuit analysis and design.

Programme Outcomes (POs)

Knowledge

Skills

Attitude

PO 1 Engineering Knowledge

- Apply knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems

PO 2 Problem Analysis

- Identify, formulate, research literature and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences

PO 3 Design/ Development of Solutions

- Design solutions for complex engineering problems and design systems, components or processes that meet specified needs with appropriate consideration for public health safety, cultural, societal and environmental considerations

PO 4 Investigation

- Conduct investigations of complex problems using research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of information to provide valid conclusions

PO 5 Modern Tool Usage

- Create, select and apply appropriate techniques, resources and modern engineering and IT Tools, including prediction and modeling, to complex engineering activities, with an understanding of the limitations

PO 6 The Engineer and Society

- Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice

PO 7 Environment and Sustainability

- Understand the impact of professional engineering solutions in societal and environmental contexts and demonstrate knowledge of and need for sustainable development

PO 8 Ethics

- Apply ethical principals and commit it to professional ethics and responsibilities and norms of engineering practice

PO 9 Individual and Team work

- Function effectively as an individual, and as a member or leader in diverse teams and in multi disciplinary settings

PO 10 Communication

- Communicate efficiently on complex engineering activities with the engineering community with society at large, such as being able to comprehend and write effective presentations, and give and receive clear instructions

PO 11 Project Management and Finance

- Demonstrate knowledge and understanding of engineering and management principles and apply these to one's own work, as a member and leader in a team to manage projects in multidisciplinary environments

PO 12 Lifelong Learning

- Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadcast context of technological change

About TGPCET

Tulsiramji Gaikwad-Patil College of Engineering and Technology (TGPCET) was established in the year 2007 by Vidarbha Bahu-uddeshiya Shikshan Sanstha (VBSS), a registered society. It is a self-financed Private Engineering College, which is affiliated to Rashtrasant Tukadoji Maharaj Nagpur University (RTMNU) Nagpur and disapproved by

All India Council for Technical Education, New Delhi.

And also college is approved by Directorate of Technical Education (DTE), Mumbai,

Maharashtra State. The Institute is Accredited with A+ (3.32 CGPA) by NATIONAL

ASSESSMENT AND ACCREDITATION COUNCIL

(NAAC). An Autonomous Institute affiliated to RTM Nagpur University, Nagpur.

TGPCET offers Eight PG programs Computer Science and Engineering (CSE), Integrated Power System (IPS)

- ❖ Aeronautical Engineering,
- ❖ Biotechnology Engineering
- ❖ Computer Science Engineering
- ❖ Data Science Engineering
- ❖ Mechanical Engineering
- ❖ Electrical Engineering
- ❖ Information Technology Engineering
- ❖ Electronics and Communication Engineering
- ❖ Bachelor of Computer Application
- ❖ Bachelor of Business Administration
- ❖ Master of Business Administration
- ❖ Master of Computer Application

NATIONAL BOARD
OF ACCREDITATION

About Us

Established with B. Tech ECE in the year 2007-08 with an intake of 60. It has been one of the key departments, active in teaching and research since its inception in 2007. It has well qualified and experienced faculty with novel teaching methods.

Research and training activities are based on VSAT, Atmel, μP & μC and SATCOM laboratories. A separate computing facility has been established to carry out project work and design jobs taken up by the department.

The Department has a state-of-the-art Microwave & Radar Engineering Laboratory in addition to well- equipped laboratories in the areas of Electronic Devices, Communication Engineering, Digital Signal Processing, Microprocessor and Microcontroller and Digital Electronics.

The department has Industry Institute Partnership Cell (IIPC) which aims to establish and explore proper links with various departments, agencies and industries all over the country. It also aims to work in close coordination with the industries and organizations for placement and training of the students, to support R & D and sponsored projects from industries, to exchange personnel between the Industries and the Institute by organizing guest lectures by Industrial experts, evaluation of project work, development of curriculum as per industry needs and other academic work in the Institute.

The sponsored project of our students “GSM Based Automatic Response System for Locomotive Trouble Shooting” designed for the three phase locomotives WAG 9 / WAP 5 / WAP 7 in Indian Railways, started under the guidance of TRO dept. of Central Railway Commission in Nagpur Division is appreciated by General Manager, Central Railways Mr. Subodh Jain in Ballarshah during his annual inspection of Ballarshah- Sevagram section and is practically implemented in Nagpur division.

The project was published in BPQ – SEGM section Booklet-B: Performance Parameter of Central Railway, Nagpur on 17th January 2012.

Student of ECE Department won 2nd Prize in XVIIth ISTE Student National Annual Convention

Message from the Desk of Management

“Education is the passport to the future, for tomorrow belongs to those who prepare for it today.”

Dr. Mohan Gaikwad-Patil, with more than 35 years of experience in the education system to his credit, established the Gaikwad-Patil Group of Institutions in Nagpur to cater to the quality education needs of the youth in Vidarbha. His early experience teaching in an engineering college made him acutely aware of the dissonance between engineering education in the country and the requirements of the industry. He therefore began with the dream of starting an engineering college that equips students with knowledge, skills, and attitudes relevant to the industry. That dream has manifested today in the form of an educational group well known in the region for its constant striving to impart quality and industry-relevant education to the students by teaching courses like B.Tech, M.Tech, Architecture, Polytechnic, MBA, MCA, Pharmacy, BAMS, Physiotherapy and Nursing. Hardly in his early forties, Dr. Mohan Gaikwad-Patil is the young and dynamic face of the group. His contagious enthusiasm and unflagging drive are truly inspiring.

Dr. Mohan Gaikwad-Patil
Chairman, Gaikwad-Patil Group

Mr. Akash Gaikwad-Patil
Vice Chairman, Gaikwad-Patil

“Education is not preparation for life, education is life itself.”

In a world brimming with challenges, the need for brilliant engineers who can think critically, solve problems creatively, and adapt to a rapidly evolving technological landscape has never been greater. At TGPCET, we are committed to providing an education that goes beyond textbooks. Our curriculum is meticulously crafted to equip students with the technical expertise, soft skills, and design thinking abilities necessary to thrive in the ever-changing engineering landscape. We believe in nurturing well-rounded individuals with a strong foundation in ethics, social responsibility, and a passion for making a positive impact on the world. Our state-of-the-art facilities, coupled with a dedicated and experienced faculty, provide a stimulating learning environment that ignites curiosity and encourages exploration. We don't just produce engineers; we empower future leaders, innovators, and entrepreneurs who will shape the world of tomorrow. We are confident that our graduates will be at the forefront of technological advancements, tackling global challenges, and building a future brimming with possibilities.

Dr. Anjali Patil-Gaikwad
President, Gaikwad-Patil Group

“Shaping Minds, Building Futures: Welcome to the Engineering Innovation Hub.”

“Welcome to TGPCET, a premier institution dedicated to nurturing exceptional engineers who can shape the world of tomorrow. Here, we believe in cultivating a stimulating learning environment that fosters creativity, critical thinking, and a passion for innovation. Our vision is to provide a holistic learning experience that equips you with the technical expertise, leadership skills, and innovative thinking needed to thrive in a dynamic industry. With a rich legacy of academic excellence, we offer a diverse range of engineering and management programs designed to equip you with the knowledge, skills, and experiences needed to thrive in the ever-evolving engineering landscape. Our dedicated faculty, state-of-the-art facilities, and strong industry partnerships ensure you receive a well-rounded education that prepares you for success in your chosen field. We invite you to join our vibrant community and embark on a journey of excellence.”

“Creating a Brighter Tomorrow, One Investment at a Time: Your Pathway to Engineering Excellence.”

The essence of life is to live a life for others and die for a noble cause. We express our gratitude for receiving an opportunity to serve the nation. We have a crystal-clear vision of enlightening the student brain with a sound and technology-rich academic curriculum. We pledge to ensure that the students will not only progress in their respective fields but will also become responsible citizens by abiding by the rules and will live disciplined life. Our college has state-of-the-art facilities for teaching, research and development. The students who have passed out of our college have already proved their mettle in various fields. I personally appeal to all the students to make use of the facilities here and improve their skills to have a glorious career ahead

Dr. Sandeep Gaikwad
Treasurer, Gaikwad-Patil Group

Message from the Desk of Principal & Vice Principal

“Nurturing Innovation, Empowering Leaders - Engineering Education Redefined.”

It is my privilege to warmly welcome you to the college, which is an autonomous institution, committing to quality education. We work on the principle of “Learn to Grow” With this very inspiring thought, Vidarbha Bahu Uddeshiya Shikshan Sanstha Nagpur has laid a foundation to provide education in the field of engineering to the students to enable them to become good practicing engineers, capable managers and above all a good human being to build a stronger, vibrant and skilled India. We dream that TGPCET should play a definite role in shaping the careers of tomorrow's leaders and developing individuals to have an impact on global development.

Looking at our track records, TGPCET has achieved many feathers in terms of consistently good results, placements, and extracurricular activities too. We are continuously in the process of imparting quality education to our budding engineers. This journey is succeeding more gloriously year after year making our Engineers rule the world. Success depends on opportunity. Try to get the maximum from the available resources. I wish best of luck in all your endeavors.

Dr. P. L. Naktode
Principal

Dr. Pragati Patil
Vice Principal

Welcome to Tulsiramji Gaikwad Patil College of Engineering and Technology (TGPCET) in Nagpur, Maharashtra, a leading educational institution. Inspired by the words of Shri. APJ Abdul Kalam, "Dreams are not those which we see while sleeping, but dreams are those which do not let us sleep,". TGPCET strives for ambitious goals through knowledge acquisition, hard work, and perseverance. Our institution has quickly emerged as one of Maharashtra's premier technical education institutions. We emphasize academic excellence and technical skill development to meet industry demands while instilling values of integrity, morality, and sustainability.

At TGPCET, we leverage cutting-edge technology to foster an innovative learning environment, encouraging students to think critically and explore new ideas. Our students engage in national and international competitions to tackle real-world challenges, supported by faculty who stay updated with the latest technologies. Professional organizations like IEEE, CSI, ISTE, SAE-India, and SESI enhance skills through robust platforms. Beyond academics, we promote holistic development through sports, cultural activities, and social initiatives, nurturing responsible citizens. Join TGPCET to excel, innovate, and lead in a supportive environment where growth and transformation are limitless.

Message from the Desk of HoD

Dear Esteemed Readers,

It is with great pleasure and pride that I extend my warmest greetings to you through the pages of this esteemed technical magazine. As the Head of the Electronics & Communication Engineering Department, I am thrilled to share some of the extraordinary accomplishments that our department has achieved over the past year.

Our commitment to excellence in education and research is reflected in the numerous awards earned by both our students and faculty members. This accomplishment not only showcases the dedication of our students but also speaks volumes about the quality of education and resources provided by our department.

I am delighted to announce that our department has consistently produced university toppers, exemplifying the academic prowess of our students. This is a testament to the high standards we maintain in our teaching methodologies, as well as the continuous support provided to our students to help them excel in their academic pursuits.

Thankyou everyone who has been a part of this incredible journey, and I invite you to delve in to the pages of this magazine to explore the depth of our achievements and the promising future that lies ahead.

Warm Regards,

Prof. Rohini Pochhi

Head of Department Electronics and Communication
Engineering Department Tulsiramji Gaikwad Patil
College of Engineering and Technology, Nagpur.

Prof. Sandeep Thakre

Message from the Desk of Editor

*It gives me immense pleasure to present to you the latest edition i.e Volume V, Issue 2 of the **Technical Magazine** of the Department of Electronics and Communication Engineering. This magazine is a platform for showcasing the innovative spirit, technical acumen, and creative flair of our students and faculty members. Through this publication, we aim to highlight the remarkable journey of learning, discovery, and invention that defines our department.*

In today's rapidly evolving technological landscape, Electronics and Communication Engineering continues to be at the heart of innovation. From the core fundamentals of analog and digital electronics to the cutting-edge realms of embedded systems, VLSI design, wireless communication, and the Internet of Things (IoT), our discipline is ever-expanding.

A special mention must be made of the brilliant contributions by our students, whose passion for technology and innovation shines through every article and project featured in this issue. Their curiosity, perseverance, and ability to bridge theory with practice are commendable. Equally deserving of praise are our dedicated faculty members, who guide and mentor students through every challenge, and who themselves remain committed to lifelong learning and academic excellence.

This magazine also celebrates the spirit of collaboration that thrives in our department—between students and teachers, academia and industry, and theory and practice. It is this synergy that equips our graduates to step confidently into the professional world, ready to tackle real-world challenges and contribute to society through engineering solutions.

Let us continue to learn, innovate, and excel—together.

*Warm regards,
Mr. Sandeep Thakre
Editor-in-Chief*

I would like to extend my sincere gratitude to the editorial team, faculty coordinators, student contributors, and everyone who supported the creation of this magazine. Your hard work, creativity, and commitment have made this publication a true success.

AI and Edge Computing in Electronics and Communication

Artificial Intelligence (AI) and Edge Computing are transforming the landscape of Electronics and Communication Engineering (ECE) by enabling devices to process data locally rather than relying on remote cloud servers. This approach significantly reduces latency, enhances data privacy, and improves overall system efficiency — all critical in real-time communication systems.

Edge AI involves deploying lightweight, power-efficient AI models on embedded systems and edge devices. Semiconductor companies like NVIDIA, Intel, and Qualcomm have developed specialized chips that integrate AI capabilities directly into communication hardware. This advancement is particularly beneficial for applications such as autonomous vehicles, smart surveillance, remote healthcare, and industrial automation, where rapid data processing and minimal delay are crucial.

In communication networks, Edge AI is used to optimize bandwidth usage, manage network traffic, and detect anomalies in real-time. For instance, 5G and upcoming 6G technologies incorporate edge computing to ensure faster, more reliable data transmission with localized decision-making. By bringing intelligence closer to the data source, AI and Edge Computing enable smarter electronic systems and more adaptive communication infrastructures. As this integration deepens, it is set to redefine how devices interact, process, and communicate, driving innovation across consumer, industrial, and defence applications in ECE.

Assistant Professor
Electronics & Communication
Engineering

Quantum Communication: The Future of Secure Data Transmission

In an era dominated by digital data, the importance of secure communication is greater than ever. As traditional encryption methods face growing threats from advancing technologies, especially quantum computers, researchers and engineers are turning to quantum communication — a field that leverages the principles of quantum mechanics to enable ultra-secure data transmission.

Quantum communication is the use of quantum mechanics to transmit information in a way that is fundamentally secure. At its core, this technology utilizes quantum bits (qubits) instead of classical bits. Unlike classical bits that are either 0 or 1, qubits

can exist in a superposition of both states simultaneously.

The most remarkable aspect of quantum communication is its ability to detect any attempt at eavesdropping. This is made possible by the no-cloning theorem and the Heisenberg Uncertainty Principle, which state that any measurement of a quantum system inevitably disturbs it. Therefore, if a third party tries to intercept a quantum message, it changes the message itself — revealing the intrusion. Entanglement is a phenomenon where two or more qubits become linked, such that the state of one instantly influences the state of the other, regardless of the distance between them. This “spooky action at a distance,” as Einstein called it, is crucial for quantum communication protocols like Quantum Teleportation and Quantum Key Distribution (QKD). QKD is the most well-developed application of quantum communication. It allows two parties to generate a shared, secret cryptographic key that can be used to encrypt and decrypt messages. The most famous QKD protocol is BB84, proposed by Charles Bennett and Gilles Brassard in 1984. With QKD, any attempt to eavesdrop on the key exchange is detectable, ensuring that the communication remains secure.

Students Corner- Technical Article

IoT and Digitization: Transforming the World Through Connectivity

The world is becoming increasingly connected as digital technologies evolve. One of the key enablers of this digital revolution is the Internet of Things (IoT). IoT refers to physical objects—devices, sensors, machine connected to the internet that can send, receive, and process data. Digitization involves converting manual or analog processes into digital systems. Together, IoT and digitization are creating smarter environments and transforming industries. This article illustrates how these technologies work hand in hand using real-life examples.

The integration of the Internet of Things (IoT) with digitization is

reshaping modern life by automating processes, enhancing data-driven decisions, and improving system efficiency. This article explains the concept of IoT-powered digitization through real-

world applications. Each section introduces the use case before presenting examples, offering a clear picture of how connected devices are fueling the digital transformation across industries.

IoT is also helping farmers monitor conditions and make better decisions for crop health and water use. Soil moisture sensors activate irrigation systems only when needed, saving water.

IoT plays a foundational role in modern digitization efforts. It connects the physical and digital worlds, bringing intelligence and efficiency to every domain it touches. As adoption grows, IoT will continue to drive digital transformation across industries, creating smarter systems and better experiences for users worldwide.

ABSTRACT

The conference offered an international forum for discussion and exchange of knowledge on opportunities and challenges related with all facets and aspects of technological innovations & applications in Industry 4.0, its challenges and way ahead. The objective of this international conference was to provide a platform for policy makers, academicians and researchers to share their experiences and knowledge by presentation of scientific advances made in the field of Industry 4.0.

Industry Sponsored Projects

1. Title of Project: Fault Detection in production packaging line using PLC and Raspberry PI Integration

Students Associated: 1. Mr. Asish Hajare
2. Mr. Tejas Rokade
3. Mr. Prajwal Borkar
4. Mr. Vivek Sahare
5. Ms. Tanvi Waghmare
6. Ms. Roshni Katekhaye

Guided By: Mr. Yogesh Wasade

Sponsored by: VR Jamdar Siemens Centre

Abstract: In this project, a hybrid Raspberry Pi, PLC based approach is proposed for detecting faults in a packaging line production. The system provides real-time monitoring of labeling and sealing processes for detecting defects like stamp-off, empty spaces, and seal breakdown. The control unit comprises of PLC and a Raspberry Pi as the microcontroller. Signal deputies (cameras or IR) of the system are calibrated at accurate angles around the line to optimize parameter surveillance efficiency using IR sensors for recognition of any misalignment

2. Title of Project: Garbage Monitoring and Tracking System Using IoT

Students Associated: 1. Mr. Prasanna Pojgey
2. Ms. Krupali Paunkikar
3. Mr. Maajid Ali

Guided by: Dr. Dinesh Lingote (Principal Scientist, IT Infrastructure, CSIR-NEERI)

Sponsored by: CSIR- NEERI

Abstract: The increasing rate of urbanization and population has created major waste management challenges, particularly in developing nations like India, which produces around 1.5 lakh metric tons of solid waste generates per day, posing serious environmental and health risks. To tackle these challenges, the system is driven by the Internet of Things (IoT). The system incorporates sensors, camera modules, and a GPS tracker into smart bins. The sensors collect real-time data, while the cameras detect overflowing bins, and the GPS tracker monitors the location of each smart bin. The system allows users to report incidents of overflowing waste or illegal dumping on application. This IOT framework not only reduces pollution but also promotes cleaner and healthier urban environments. By combining technology with sustainability, this method is more habitable and eco-friendlier for urban communities.

CERTIFICATE

This is to certify that **Mr. Prasanna Pojgey**, a student of B.Tech in Electronics and Communication, Tulsiramji Gaikwad Patil college of Engineering and Technology, has carried out the Internship Report titled "**Garbage Monitoring and Tracking System Using IOT**" under the guidance of **Dr. Dinesh Lingote**, Principal Scientist, IT Infrastructure, CSIR-NEERI, Nagpur during **18th July 2024 to 17th January 2025**.

The work carried out under this project is to be used only for academic purposes and prior permission of CSIR-NEERI is required before publishing this work.

We wish him all the best for future endeavors.
